

When our customers talk about meteodyn WT ...

“Easier and faster to use than Wasp”

Laura Corrochano – Wind Engineer – Gamesa (SP)

“Meteodyn WT is definitively well suited to be used on a daily basis by non CFD specialists. It provides good information, for better decisions”.

Rémi Gaudoin – Wind Engineer – Dong Energy (DK)

“Failure of convergence does not happen very often, so in most cases work is efficient and in-time when using meteodyn WT”

Christoph Bauer – Senior Project Manager – Lahmeyer International GmbH (DE)

“Meteodyn WT’s considerations of forest canopy, atmospheric stability, grid refinement are very good”

Hyun-Goo Kim – Senior Researcher of Wind Energy research Group - Korea Institute of Energy Research (KR)
