

**PRESS RELEASE – February, 17 2015**

## ***Meteodyn to appoint a new distributor in the UK!***

*Meteodyn, wind simulation software developer, now relies on a new reseller to expand its global network. The company **The Solar Design Company** is in charge of meteodyn WT software sales in United Kingdom.*

The Solar Design Company is a consulting firm with extensive experience in simulation software & survey tools for renewables energies.

Simulation software is the ideal design tool, making accurate predictions easy. Give customers the best return on their investment by visualizing systems and creating professional reports.

The company extends his offer to wind energy producers by distributing **meteodyn WT** - the wind resource assessment software for site suitability, wind farm design, wind farm production and energy optimization.

The Solar Design Company gives to its customers access to a high-quality service and training on site.
